

IT package

329 Bracknell has its own superfast fibre-optic link, which can provide dedicated bandwidth to your business instantly. Your phones and internet are up and running the day you move into your new office.

You select the IT package you need including handsets, phone lines, internet access and secure internal network. You can even have your own dedicated secure rackspace. Everything is covered by one itemised monthly bill.

Pay the right price for what you need now, with the flexibility to review this at any time.

Benefits

- Access to a business-grade IT and telephony infrastructure that is secure, resilient and immediately available.
- Infrastructure continually maintained and upgraded at no cost to you.
- Anti-virus protection with built-in firewall to ensure a high level of security.
- Extra security with all your internet traffic running on its own private network.
- Access to call recording, static ip addresses, virtual private networks and a range of additional service to serve your business needs.

On-site support team

- On-site staff will set up your connections for you.
- Customised requirements to suit legal or security restrictions you require.
- Network monitored 24 hours a day.
- 329's centre team can handle your calls and messages for you.
- Complimentary consultation prior to moving into your new office to ensure all your communication requirements are met.

Performance

- 100Mb superfast fibre-optic internet.
- Choice of dedicated bandwidth available.

Technical support

- Helpdesk for quick resolution of any issues.
- Engineer attendance if required.
- Advanced technical support is always available.
